CASTING I & CASTER ENHANCEMENTS

Conversion of Ispat Inland™s No. 1 Slab Caster to Vertical Bending

by R. Gass, J. Knoepke, J. Moscoe, R. Shah, J. Beck, J. Dzierzawski and P. E. Ponikvar

3

Development of Technology for Blowing Fine Bubbles into Tundish Through Porous Plug Using Molten Steel Flow

by H. Yamaura, Y. Ueshima, Y. Mizukami, K. Takase, K. Amada and A. Uehara
..... 19

Conversion of Burns Harbor™s Slab Casters from Lift to Quick SEN Changing

by M. R. Ozgu, W. E. Sattler, C. A. Farlow and L. J. Lawrence..... 31

Twin Casting Process in the Continuous Slab Caster No. 2 at Companhia Siderurgica de Tubarao (CST)

by C. A. Perim, R. R. Cunha, A. D. do Nascimento, M. F. Matos and A. G. daSilva 41

Study on Effect of Nozzle Arrangement Manner in Secondary Cooling Zone on Slab Quality for No. 1930 Slab Caster at Baosteel

by G. Wen, P. Tang, Z. Han, F. Mei, X. Ruan, L. Zhang and H. Li 49

Melt Flow Control in a Complex Geometry Tundish at High Casting Rates

by R. D. Morales, J. de J. Barreto, L. Garcia-Demedices and J. Palafox-Ramos
..... 57

MAINTENANCE AS A PROCESS I

Isolated Integration . A Multi-Layered Fiber Network Installation in the Slab Group, Sparrows Point Division, Bethlehem Steel Corp.

by C. D. Ryan..... 83

Condition Based Maintenance of Turret Bearing Continuous Casting of Steelmaking

by F. M. Ghiglione..... 91

Revamp of the Two DC Furnaces at Nucor Steel Œ Decatur

by J. K. Cotchen, E. Mueller, M. Hess and M. Green..... 103

Exfoliation Corrosion on Dofasco™s No. 1 Continuous Caster

by G. Lake, R. Dufresne, S. D. Klatskin..... 115

METALLURGY I & INCLUSION ENGINEERING

Inclusion Analysis to Predict Caster Behavior

by S. R. Story, T. J. Piccone, R. J. Fruehan and M. Potter..... 129

Inclusion Investigation During Clean Steel Production at Baosteel

by L. Zhang, B. G. Thomas, K. Cai, J. Cui and L. Zhu..... 141

Aspects of CaFe Cored Wire Injection into Steel

by W. Tiekink, R. Boertje, R. Boom, R. Kooter and B. Deo..... 157

Relationship Between Nozzle Deposits and Inclusion Composition in the

Continuous Casting of Steels
by F. Fuhr, C. Cicutti, G. Walter and G. Torga..... 165

Inclusions in Aluminum-Killed Steel with Varying Calcium Additions
by K. Ahlborg, R. J. Fruehan, M. S. Potter, S. R. Badger and G. S. Casuccio
..... 177

METALLURGY II & PROCESS AND PRODUCTS I

Steel Cleanliness at SIDMAR
by R. Dekkers, B. Blanpain, P. Wollants, F. Haers, B. Gommers and
C. Vercruyssen..... 197

**Development of Low Carbon Low Nitrogen Steel at Companhia Siderurgica
DeTubaró (CST)**
by E. A. Caldeira, C. de Azevedo, V. G. Santana, C. A. Perim, C. D. Barão and
S. de Souza Santos..... 211

Application of Cathodoluminescence Microscopy (CLM) in Steel Research
by H. Yin and H. T. Tsai..... 217

A Production of ULC IF Steel Grades at Voest-Alpine Stahl GmbH, Linz
by A. Jungreithmeier, E. Pissenberger, K. Burgstaller and J. Mörtl 227

Characterization of Inclusions in TiSULC Steels from Degasser to Mold
by H. M. Pielet, H. T. Tsai and R. T. Gass..... 241

CCT Diagrams for Mold Flux Crystallization Studies
by A. Prasad and H. Henein..... 257

REFRACTORIES I

**Tundish Slide-Gate System for Enhanced Performance, Reduced Alumina
Clogging and Extended String Length**
by P. D. King, L. J. Heaslip, D. Xu, J. D. Dorricott and Q. K. Robinson..... 265

**Degradation Mechanism of Stopper Ends and Nozzle Seating Areas in
Continuous Casting**
by G. Walter, P. Ventura, F. Medina, P. Galliano and R. Topolevsky..... 283

**Effect of Glass Fiber and Fe₂O₃ Additions to MgO Tundish Lining on the
Wettability of Molten Steel/MgO System**
by Y. Turen, E. Candan, K. Kocatepe and F. Alâ..... 293

Thermal Control System of CST™s Steelmaking Plant
by B. R. Henriques, B. Rosa, O. J. Kirmse, S. L. da Silva Murrer,
P. S. B. Lascosqui and S. de Souza Santos..... 301

**Developments of Refractory Linings for Basic Oxygen Furnaces in
Germany**
by H. Jansen and H. G. Daldrup..... 307

STEELMAKING I & STEELMAKING INPUTS

VAI-CON_v Desulf . A Pioneering Process for Hot Metal Desulfurization
by H. Pirker and J. Müller..... 323

**High Efficient Hot Metal Desulfurization Process with Propane Gas Top
Blowing Method**
by H. Ogawa, N. Kikuchi, T. Yamauchi and H. Nishikawa..... 335

More Steel Out of Less Hot Metal During the Reline of a Blast Furnace

<i>by J. P. Brockhoff, H. ter Voort, G. G. M. de Gendt and R. Mostert</i>	345
Scrap Optimization . Strategy for a New Era of Steelmaking	
<i>by B. Martin and R. Whipp</i>	355
Development of the Ladle Slag Recycling Process by Using the Multi-Divided Slag Pot	
<i>by J.-H. Park, J.-Y. Ryu, J.-D. Lim and C.-H. Keum</i>	363
Yield Improvements and Iron Desulfurization when Utilizing itFlow-Aidedlo Compounds for Modifying Slag Characteristics	
<i>by L. Wolfe and L. Olson</i>	369
FASTEEL: The Next Step in Steelmaking	
<i>by K. J. Shoop, J. C. Simmons and J. M. McClelland</i>	379

STEELMAKING II & ADVANCED EAF OPERATIONS

EAF Energy Optimization at Nucor-Yamato Steel	
<i>by A. Pujadas, J. McCauley and M. Iacuzzi</i>	391
ACI PyreJet Technology: A Key Step in JYXC™s Strategy Toward World Class Specialty Steel Production	
<i>by Q. Gang, L. Wenshuang, X. Xiaohong, O. Delabroy, A. Popenov and C. Chen</i>	403
Results of Goodfellow EFSOII at Birmingham Steel Corp., Seattle, WA, USA	
<i>by M. I. Khan, E. J. Evenson and O. I. Negru</i>	415
Continuous Horizontal Sidewall (CHS) Scrap Charging	
<i>by J. K. Cotchen and M. J. Stercho</i>	429
Unusual Arcing Phenomena in Modern Arc Furnaces: An Update	
<i>by B. Bowman, W. Adams, B. Howard, N. Lugo, S. Alameddine and P. Stafford</i>	445

CASTING II & NEW TECHNOLOGIES IN CASTING

Startup and Operating Experience of the CASTRIP Process at Nucor-Crawfordsville	
<i>by P. Campbell, W. Blejde, R. Mahapatra and G. Gillen</i>	451
Status, Results and Application of the EUROSTRIP √ Twin Roll Strip Casting Process	
<i>by G. Hohenbichler, U. Albrecht-Früh, H. Legrand, and J. Schnalzger</i>	461
Study on Level Fluctuation and Fluid Mixed Characteristics in Mold for Twin Roll Strip Caster by a Water Model	
<i>by G. Wen, M. Zhu, J. He and P. Ding</i>	475
A New Explanation for Liquid Core Reduction in Thin Slab Casting	
<i>by Z. Lu</i>	485
Electromagnetic Stirring in Slab Caster Molds . What and Why?	
<i>by P. H. Dauby and S. Kunstreich</i>	491
Electromagnetic Stirring in the Mold at the Newly Rebuilt POSCO No. 3-3 Machine	
<i>by S.-M. Lee and O.-D. Kwon</i>	505

MAINTENANCE AS A PROCESS II

Basic Analysis of Grease Thickeners

by J. Schlobohm..... 521

Care and Maintenance of Weighing Equipment in the Melt Shop

by E. Toth ... 525

The Integration of Multiple SVC™s on a Single EAF Bus

by E. R. Braunschweig, W. Hoerger and R. Alka 533

Breaking the Work Harder Syndrome During Process Improvement

by M. Bresko 545

METALLURGY III & MOLD FLUXES

Measurement and Control of Mold Flux on a Continuous Caster

by R. Shah, J. G. Williams and G. Hecko..... 555

Investigation on Mold Powder of Low Carbon Steel for CSP Thin Slab Continuous Casting

by P. Tang, G. Wen, Z. Wang, S. Fan, Z. Zhang, S. Li and H. Li..... 567

The Effect of Mold Flux Films on Radiative Heat Transfer on Copper

by J. Park, A. B. Badri, J. T. Wolfe, P. Nolli and A. W. Cramb 575

Interfacial Friction Related Phenomena in Continuous Casting with Mold Slags

by Y. Meng and B. G. Thomas 589

REFRACTORIES II

EAF Refractory Performance at Pacific Steel - New Zealand

by D. Sanford, B. Garside, C. Schonewille and T. Miller 609

Surface Temperature Differences in Refractory Lining Deduced from Post-Mortem Analysis

by P. Galbiatti, L. Flores, R. Diaz, L. Ferro, P. Galliano and R. Topolevsky
..... 621

Steel Ladle Campaign Improvements at Bethlehem Steel OE Sparrows Point Division

by J. O. Barrett, R. E. Fash, T. Richter and B. Patterson..... 629

Technological Evolution of Magnesia-Carbon Bricks for Steel Ladles in Argentina

by A. Figueiredo Jr., N. Bellandi, A. Vanola and L. Zamboni..... 635

STEELMAKING III & PROCESS IMPROVEMENTS

How to Establish Continuous Improvement in Steelmaking

by M. Fleischer, G. W. Bünemann and R. C. Pierce..... 647

Prediction and Prevention of Slopping in the BOF

by M. Shakirov, A. Boutchenkov, G. Galperine and B. Schrader 655

The Future for Lance Based Vision and Sensing Systems in the Steel Industry

by S. T. Jensen, M. P. Bonin, B. Federoff, N. Rymarchyk Jr. and T. Smith
..... 667

Converters Revamping with New Combined Blowing Process by CST

by C. D. Barão, D. B. Moreira, J. C. Duarte and J. A. de Souza Jr. 675

CASTING III & MOLD TECHNOLOGIES

Ideal Taper Prediction for Billet Casting

by C. Li and B. G. Thomas 685

High Quality and High Speed Casting Technologies for Round Billet Caster

by A. Hirata, H. Hayashi, M. Kawamoto, K. Iwata, Y. Tsukaguchi and
A. Yamanaka..... 701

Heat Balance of Siderar Continuous Casting

by R. D. Lopez 709

Continuous Caster Design for High Quality Steel in Nippon Steel Corp.

by S. Shima, Y. Maruki, T. Toh and K. Tsunenari 721

METALLURGY IV & VANADIUM MICROALLOYING

The Supply and Use of Vanadium

by P. S. Mitchell 735

Microstructure and Impact Properties of Welds in a HSLA Steel Prepared with ER70S-2 and ER70S-3 Electrodes

by J. N. DuPont and A. R. Marder 747

Nitrogen Strain Aging in Microalloyed Steels

by R. J. Glodowski 763

Some Factors Affecting the Ductility of Steel at High Temperatures

by R. Buelte..... 773

The Economics of Microalloyed Steel

by M. Korchynsky 781

METALLURGY V & SECONDARY PROCESSING

Dissolution of Inclusions in Steelmaking Slags

by M. Valdez, K. Prapakorn, S. Sridhar and A. W. Cramb..... 789

Dissolution of Magnesite and Dolomite in Simulated EAF Slags

by R. J. Fruehan, Y. Li and L. Brabie 799

Recycling of Ladle Slag and Spent Refractories by Injection into EAF

by S. Porisiensi 813

Soft Shooting of Lighter Materials into the Depth of a Liquid Pool

by K. Du and W.-K. Lu 819

The Control of Tundish Slag Behavior in Continuous Casting Process

by H.-J. Mun, C.-H. Lee, W.-Y. Choi and S.-H. Kim 833

STEELMAKING IV & SECONDARY STEELMAKING AND SLAGS

Ladle Eye Detection Using Multi-Variate Image Analysis

by G. Brooks and S. Subagyo 843

Equipment and Practice Enhancements at Dofasco™s Vacuum Degas Tank for ULC Steel

by T. Kuhl, S. Sun and M. K. Trinh..... 853

Development of Ladle Slag Practices at Siderar

by C. Cicutti, M. Valdez, J. Petroni, R. Ares, R. Donayo and A. Gomez..... 865

Radio Wave Interferometer Measurements of Slag Depth <i>by L. B. B th</i>	875
Experience and Results Obtained in the BOF™s of AHMSA when Fabricating in Plant its Own Synthetic Slags <i>by L. J. Velez N., G. H. Zamora and V. F. Flores</i>	883

FOUNDRY

Comparison of the Desulfurization of Pig Iron with Lime or Calcium Carbide Co-Injected with Magnesium <i>by J. R. Claes and J.-P. Massin</i>	895
Chemical and Microstructural Comparison Between Ductile and Cast Steel <i>by M. DeBruin</i>	905
Disintegration and Wetting Behavior of Silicon Carbide Briquettes <i>by A.-D. Saikia, V. L. Richards and K. D. Peaslee</i>	915
Optimal Control of Cupola Operation <i>by Y. M. Gordon</i>	925

MAINTENANCE AS A PROCESS III

Measurement of the Wobble in a Mold . Continuous Casting of Steelmaking <i>by F. M. Ghiglione</i>	937
Comprehensive Mold and Oscillator Monitoring as a Means to Reduce Maintenance Costs, Enhance Quality and Productivity <i>by M. J. Korzi, J. E. Arzberger and W. H. Emling</i>	949
Extending the Performance of Caster Components at Wheeling Pittsburgh Steel <i>by C. Keller, T. Evans, D. Graham and W. H. Emling</i>	963
Caster Operation, Design and Maintenance to Ensure High Product Quality <i>by B. Patrick and B. Barber</i>	975

METALLURGY VI & PROCESS AND PRODUCTS II

KOBM Versus EAF Steel . Which is Cleaner? <i>by T. Vert and J. Byrne</i>	989
Different Slivers Type Observed in Sollac Steel Plants and Improved Practice to Reduce Surface Defects on Cold Rolled Sheet <i>by P. Rocabois, J. N. Pontoire, V. Delville and M. Marolleau</i>	995
Steel Sampling to Study Inclusions <i>by R. Dekkers, B. Blanpain and P. Wollants</i>	1007
Peritectic Transition in the Hypoperitectic Iron-Nickel System <i>by N. J. McDonald and S. Seetharaman</i>	1021
The Production of Free Cutting and Improved Machinability Steels, With and Without Lead Additions at Acindar™s Steelmaking Shop <i>by O. E. Simaro and L. E. Dutari</i>	1035
Effect of Thermal Treatment Under Nitrogen-Methanol Atmosphere in	

Hardness, Case Depth and Microstructure of 1018, 8620 and 8625 AISI Steels	
<i>by M. A. Salgado Ordorica and I. Résindez Lopez</i>	1045
SPECIAL ARCS	
Mathematical Modeling of DC Electric Arc Furnace Operations	
<i>by M. A. Ramirez-Argaez</i>	1059
Causes and Remedies for Electrode Breaks	
<i>by C. F. Fulgenz</i>	1073
SMI-Texas Operating Results Using Module Technology from MORE	
<i>by A. Akers, M. Kinney and L. D. Patterson</i>	1085
Energy and Graphite Electrodes Saving in ORI Martin, Brescia, Italy	
<i>by M. Bianchi Ferri, G. Cozzi and E. Lombardi</i>	1101
SPECIALTY STEELS	
Effective Use of Nonconventional Materials in Stainless Steelmaking	
<i>by D. Liao and M. Bryant</i>	1113
Nitrogen Behavior in an AOD Converter	
<i>by X. Liu, P. Astrom and A. Appell</i>	1123
Prediction of VAR Solidification Conditions by Using Numerical Analysis	
<i>by T. Suzuki and K. Morita</i>	1137
The Impact of Casting Parameters on Electrode Quality and VAR Behavior in High Ti Ni-Fe-Cr Alloys	
<i>by M. Suer, C. Rock, J. Nance and L. Suffredin</i>	1147
STEELMAKING V Š BOF CONVERTER TOPICS	
Metallurgically Engineered Flux for Liquid Steelmaking	
<i>by B. Irmeler, K. Klimek, Z. Piegza, G. Galperine, M. Petrounine, B. Schrader and J. Opletal</i>	1157
BOF Hood Life Cycle Cost Improvement Program	
<i>by G. A. Stemetzki, M. Kuta and C. Shepard</i>	1167
Production of Linepipe Steels at Imexsa	
<i>by I. G. Saucedo and J. Nieto</i>	1185
