BLAST FURNACE OPERATIONS

Measures for Increasing the Productivity of Blast Furnace by <i>W. Hartig, K. Langner, H. B. Lungen and K. P. Stricker</i>	3
Dofasco's No. 4 Blast Furnace Hearth Management to Exceed a 12 Year Campaign by <i>B. J. Parker, R. D. Chaykowski, D. H. Pomeroy and R. J. Donaldson</i>	17
Water Quality Control at Bethlehem Steel Sinter Plant Using Magnets by <i>A. P. Davis, L. L. Tate, D. Saul and F. C. Rorick</i>	25
Tuyere Tipping, A Phenomena to Conquer by <i>I. A. Cameron, R. M. C. Timmer and G. W. Simpson</i>	35

COAL & COKE RESEARCH

Coke Strength After Reaction. Signification Regarding Various Furnace Operation and Various Cokes by <i>D. Vogt</i>	47
Operation of Pilot Scale Ovens to Produce Coke with Industrial Properties by <i>W. R. Leeder, J. T. Price and J. F. Gransden</i>	55
Automated Microscopic Blend Proportion Analysis: A Good Tool for Monitoring Multi-Component Coal Products by <i>K. Krishnamurthy and R. Kaczmarek</i>	67
Improvement of the Levelling Process to Reduce Emissions During Charging by <i>H. J. Giertz, F. Huhn, F. Rossa and A. Lukas</i>	75

BLAST FURNACE BURDENING

Utilization of Movable Armor on Edgar Thomson No. 1 Blast Furnace by <i>S. E. Yaniga and J. Hermansderfer</i>	85
Design of the Blast Furnace Burden with Bauxite Addition by <i>P. D. Nicolaou and D. J. Papanastassiou</i>	95
Development of Charging Mode for Strengthening the Central Gas Flow by <i>S.-K. Jung, T.-H. Choi and H.-D. Kim</i>	107
Low Cost Operation by a Large Blast Furnace with a Bell-less Top at Chiba Works by <i>H. Kamano, K. Sato, N. Takashima, S. Goto, T. Matsumoto, K. Takeda and T. Sato</i>	113
Results and Visualization from the First Campaign in LKAB's Experimental Blast Furnace in Lulea, Sweden by <i>G. Tranell, T. Hagelien, L. Kolbeinsen, A. Dahlstedt and M. Hallin</i>	125

Experience of Rotary Charging Unit in Bhilai Steel Plant by <i>S. B. Singh, V. V. Kammendov, S. Dutta and A. Chandra</i>	137
---	-----

BLAST FURNACE STAVES

Evaluation of the Cu to be Used in Manufacturing Blast Furnace Bosh Cooling Staves by <i>S. M. Purdy</i>	149
The Application of FEM Techniques in the Development of Copper Staves for the High Heat Load and Hearth Areas of the Blast Furnace by <i>R. Thill, A. Poensgen and I. Carmichael</i>	155
History and Development of Rolled Copper Staves by <i>P. Heinrich, E. Korbik and F. Reufer</i>	167
Cast Copper Staves — An Economic Alternative by <i>K. Miller and M. Baylis</i>	191
Cast Copper Cooling Stave for Blast Furnace by <i>S. Shimogoryo, M. Gocho, K. Kimura, A. Sakai, M. Matsuura and M. Tsukamoto</i>	203
Efficient Furnace Wall Design with Fourth Generation Stave by <i>T. Okuda, K. Kishigami and H. Ishikawa</i>	213

BRIQUETTING AND SINTERING

Benefits of Recycling Blast Furnace Waste Materials at National Steel — Great Lakes Division by Cold Bonded Briquetting by <i>M. P. Landow, M. I. Crawford and M. Martinez</i>	225
New Process for Recycling Iron and Zinc Units from BOP Dust by <i>X. Zhou and C. L. Nassaralla</i>	233
Development of a Technique in Sintering to Utilize Low Alumina Superfines by <i>B. Nandy and S. S. Gupta</i>	241
Mathematical Model of Air Flow During Iron Ore Sintering Process by <i>S. S. Gupta and R. Venkataramana</i>	249

COAL & COKE QUALITY

Quality Assurance — A Practical Approach by <i>J. M. Hodson</i>	261
Coal Blend Testing at Jewell's Non-Recovery Coke Ovens by <i>C. E. Ellis, C. W. Pruitt and M. A. Ball</i>	271
Automatic Coal Bulk Density Control at U. S. Steel's Clairton Works by <i>M. H. Best, D. M. Rohaus, R. L. Senchur and M. P. Zowacki</i>	279
Coke Making into the 21 st Century — Environmental Protection Efforts at Shanxi Sanjia Coal-Chemistry Co. Ltd. by <i>Y. Jiying and S. Weijie</i>	285

COAL INJECTION — FUNDAMENTALS AND PRACTICE

Coal Char Reactivity and Structure — Effects Affecting PCI Operation in a Blast Furnace by <i>L. Lu, V. Sahajwalla and D. Harris</i>	295
Determination of Proportions of Coal Char and Coke Fines in the Off Gas Blast Furnace Samples by <i>V. Sahajwalla, C. H. Kong, P. C. Chaubal and H. S. Valia</i>	305
Lowering the Cost of Iron Production: Improving Operating Cost Margins Without Capital Cost Exposure Pulverized Coal Injection for Sparrows Point by <i>T. W. Brunner, A. J. Cirillo Jr. and F. T. Eichinger</i>	313
Characteristics of 200kg/tHM PCI and Low Coke Rate of BF in Baosteel by <i>R. Zhu and K. Guo</i>	321

DIRECT REDUCTION STUDIES

A New Method for the Determination of Iron Ore Reducibility Under Fluidized Bed Conditions by <i>A. Habermann, F. Winter, H. Hofbauer, J. Zirngast, J. L. Schenk and M. Hiebler</i>	329
Cementite Formation and Stability in Iron Carbide Process by <i>J. Zhang and O. Ostrovski</i>	339
Coal Char Gasification in the COREX Process by <i>S. Shin, V. Sahajwalla and T. Kang</i>	351
Investigation of Iron Oxide Quality for COREX Plant by <i>T. Kang, V. Sahajwalla and S. Shin</i>	357
Sulphur Metal/Slag/Gas Partitioning in the Direct Smelting Furnace by <i>S. Gaal and O. Ostrovski</i>	365

CLEAN AIR COMPLIANCE: AN INTERNATIONAL PERSPECTIVE

Air Pollution Issues for Canadian Steelmakers for the Year 2000 and Beyond by <i>H. D. Goodfellow</i>	379
Air Over There — Compliance in Australia by <i>S. L. Makin</i>	389
Experience of Clean Air Management in China Steel Corporation by <i>H. Wei</i>	397
Air Emissions from the Electric Arc Furnace Operations in Luxembourg by <i>C. Werner</i>	403
CO ₂ Emissions and the Steel Industry's Available Responses to the Greenhouse Effect by <i>J.-P. Birat, J.-P. Vizioz, M. Jeanneau, M. Schneider and Y. deLassat</i>	409

PELLETIZING

Development of DR Pellets at the Iron Ore Company of Canada by <i>T. I. Martinovic</i>	423
Mineralogical Study of Iron Ore Pellets Behavior Under Reducing Conditions: New Information Given by Individual Pellet Testing by <i>J.-F. Wilhelmy, T. I. Martinovic, D. Fleury and G. Paquet</i>	429
SIMBOUL: A Software for the Simulation of the Iron Ore Pellet Induration Process by <i>S. Caron, G. Ouellet, D. Roy and G. Paquet</i>	439
Optimization of the Iron Ore Pelletizing Process by <i>J. B. Trescot, D. M. Connor and B. P. Faulkner</i>	445

BLAST FURNACE REPAIR & MODELING

Band-Aid Repair and Improvements to Siderperu Blast Furnace "Teresa" by <i>A. Chahuan, I. J. Cox and J. R. Weinheimer</i>	453
Water Requirements for Blast Furnace Copper Staves by <i>R. G. Helenbrook and P. F. Roy</i>	461
Carbon Monoxide Attack of Carbonaceous Materials by <i>D. J. Kampe</i>	471
The Rautaruukki Blast Furnace Neural System by <i>M. Alaraasakka, O. Ritamaki and R. Kanniala</i>	477
Indicators of the State of the Blast Furnace Hearth by <i>J. Torrkulla, J. Brannbacka and H. Saxen</i>	481
Modeling of Physico-chemical Phenomena to Optimize Design and Operating Parameters of Shaft Furnaces by <i>Y. Gordon</i>	489

PTD FORUM I

Hydraulic Modeling Study on Characteristics of Fluid Flow and Mixing in AOD Bath with Rotating Gas Jets by <i>J.-H. Wei, J.-C. Ma, Y.-Y. Fan, N.-W. Yu, S.-L. Yang, S.-H. Xiang and D.-P. Zhu</i>	505
Foaming Characteristics of BOF Slags by <i>S. Jung and R. J. Fruehan</i>	517

PTD FORUM II

Some Fundamental Considerations Concerning Gas Injection Operations in Steelmaking Ladles by <i>D. Mazumdar</i>	531
Transient Flow Structures in Continuous Casting of Steel by <i>S. Sivaramakrishnan, H. Bai, B. G. Thomas, S. P. Vanka, P. H. Dauby and M. B. Assar</i> ...	541
Back-attack Action of Gas Jets with Submerged Horizontally Blowing and its Effects on Erosion and Wear of Refractory Lining by <i>J.-H. Wei, J.-C. Ma, Y.-Y. Fan, N.-W. Yu, S.-L. Yang and S.-H. Xiang</i>	559
Design and Calculations of Gas Property Parameters for Constant Area Lance Under Conditions of Friction Flow with Heating by <i>J.-H. Wei, S.-H. Xiang, Y.-Y. Fan, N.-W. Yu, J.-C. Ma and S.-L. Yang</i>	571

HOWE MEMORIAL LECTURE

Fluid Flow in Metallurgy — Friend or Foe? by <i>R. I. L. Guthrie</i>	585
---	-----
