
CONTENTS

1. METALLURGICAL ASPECTS	1
Introduction	1
Steelmaking Aspects	2
Types of Steel	2
Steel Chemistry	3
Common Elements	3
Incidental Elements	4
Grain Refining Additions	4
Chemical Requirements	4
Heat Analysis	8
Product Analysis	8
Sampling for Product Analysis	8
Analytical Procedure	8
2. MANUFACTURING METHODS AND PRACTICES	11
Dimensional Ranges and Forms	11
Rolling	12
Plate Rolling	12
Types of Edges	12
Shearing and Cutting Practices – Carbon and High Strength Low Alloy	14
Alloy	17
Plate Surfaces	17
Identification	24
Thermal Treatment	24
Inspection	25
Limitations of Inspection, Testing and Certification	25
Packaging, Marking and Loading	25
Storage of Plates	25
3. QUALITY DESCRIPTIONS	27
Introduction	27
4. SPECIFICATIONS AND TESTS	29
Introduction	29
Mechanical Testing Requirements	29
Mechanical Tests Information	33
Other Tests and Requirements	33
5. PERMISSIBLE VARIATIONS	39
6. CARBON, HIGH STRENGTH LOW ALLOY, AND ALLOY STEEL ROLLED FLOOR PLATES	59
Description	59
Manufacturing Practices	59
APPENDIX A – TOUGHNESS	67
APPENDIX B – GRAIN SIZE	75
APPENDIX C – FORMING OF PLATES – COLD FORMING	77
APPENDIX D – LAMELLAR TEARING AND THROUGH-THICKNESS TENSION TESTS	81
APPENDIX E – CARBON EQUIVALENT	83
APPENDIX F – COILED PRODUCTS	85
APPENDIX G – VARIABILITY – CHEMICAL ANALYSIS AND STRENGTH	87
APPENDIX H – ATMOSPHERIC CORROSION	91
INDEX	95
