--------------------	-----

## OPENING SESSION

60 Years of Electric Furnace Conferences — A Retrospective on Arc Technology by <i>N. G. Bliss</i> .....	3
Historical Perspective on Casting Technologies and Equipment Evolution by <i>J. Dzierzawski and J. Gilbert</i> .....	11
Historical Perspective on Energy Consumption and Future Opportunities for Conservation in the U. S. Steel Industry by <i>J. R. Stubbles</i> .....	23

## FOUNDRY OPERATIONS I

Long Arc Operation by <i>M. Bock</i> .....	37
Improved Understanding of Feed Materials with Respect to Optimizing EAF Operations by <i>R. Bokan</i> .....	47
The End of “Visual Inspection” for Monitoring Scrap Quality by <i>D. A. Pflaum</i> .....	59
Reticulated Filtration of Large Ferrous Casts and Castings by <i>D. S. Heckman</i> .....	71

## MAINTENANCE I

Burnjector — High Efficiency Coaxial Supersonic Injector by <i>R. Heine, P. Horan, J. Batham and R. Harris</i> .....	81
How to Operate EAF Systems Safely Using Vacuum Type Furnace Breakers by <i>I. Hesse</i> .....	93
Multiple Harmonic Filter Design to Maximize Furnace Power and Comply with IEEE Harmonic Limits by <i>M. T. Bishop, C. A. McCarthy and M. Gresko</i> .....	107
Scantrol: For an Automatic Refractory Measurement and Maintenance System by <i>R. Heinke, K. Schaefers, C. Wasmuht, B. Stallman and R. Lamm</i> .....	119

## ENERGY AND ENVIRONMENT I

Industry/Government Research Partnership to Improve the Energy Efficiency and Productivity of EAF Steelmaking <i>by I. Chan, D. Engle, N. Margolis and C. Smith</i> .....	131
Understanding Energy Use in the EAF <i>by J. A. T. Jones</i> .....	141
Optimizing Chemical Energy Using Goodfellow EFSOP™ Technology <i>by H. D. Goodfellow and J. A. Maiolo</i> .....	155
Improvements in Arc Furnace Electrical Efficiency <i>by N. G. Bliss</i> .....	169
Future Green Steelmaking Technologies <i>by S. A. Hornby Anderson, G. E. Metius, and J. M. McClelland</i> .....	175

## SPECIAL ARCS I

Rebuilding of a 48 MVA Furnace in 41 Days <i>by C. R. Ray</i> .....	195
Ferromanganese Production — Process Understanding <i>by S. E. Olsen and T. Lindstad</i> .....	205

## STEELMAKING AND SOLIDIFICATION I

Advanced Packed Bed Type 100% Scrap Melting Process for Both EAF Works and Integrated Steel Works <i>by T. Yamamoto, Y. Ujisawa, Y. Ogawa and Y. Demoto</i> .....	219
FASTEEL™: The Hot Metal of FASTMELT® and the Continuous Scrap Feeding of CONSTEEL® <i>by J. C. Simmons, K. J. Shoop and J. M. McClelland</i> .....	231
“As Fast As Possible” Makes Cheapest Steel <i>by M. Hamy, R. Schwing and G. Bünemann</i> .....	241
EAF Melt Shop with CONSTEEL® and Hot Metal Charging <i>by A. A. Manenti</i> .....	251
A Re-Engineered DR Plant for Quality, Low Cost Onsite DRI Production <i>by R. Quintero</i> .....	261

## SPECIAL ARCS II

Electrometallurgical Relationships in Electric Smelting Furnaces <i>by J. Persson and N. G. Bliss</i> .....	415
The Application and Scale-Up of AC and DC Smelting Furnaces for Ferroalloys <i>by N. A. Barcza, I. J. Barker, M. S. Rennie and P. J. Brereton-Stiles</i> .....	425

## STEELMAKING AND SOLIDIFICATION II

Cost and Operational Benefits of Replacing Al with Si as the Primary Deoxidant of Low O and S Steel <i>by M. Adjei-Sarpong, E. B. Pretorius and H. Oltmann</i> .....	441
Beam Blank Casting Technology — Start-Up and Operational Results at PTG, Peine, Germany and Ameristeel, Cartersville <i>by H. Hoedl, Ch. Chimani and F. Wimmer</i> .....	459
Effect of Casting Parameters on Stirring Flow Velocity and its Control in Continuous Casting Molds <i>by L. Beitelman</i> .....	471
Reoxidation Behavior of Molten Steel Containing Al and Ti <i>by D. C. Park and C. H. Rhee</i> .....	483
The Status of Twin Roll Strip Casting Process for Steel Strip in POSCO/RIST <i>by H.-K. Moon, D.-K. Choo, T. Kang and K.-S. Kim</i> .....	499

## SLAGS I

Some Experimental Studies of Coal Injection into Slags <i>by F. Ji, M. Barati, K. S. Coley and G. A. Irons</i> .....	511
Measurement of Ladle Slag Oxygen Activity Using an Electrochemical Sensor <i>by B. Coletti, S. Smets, B. Blanpain, P. Wollants, J. Plessers, C. Verduyssen and B. Gommers</i> .....	525
Improvements in EAF Operation by the Use of Refining Simulation Tools Mass-Balance Programs for Foaming Slag <i>by H. G. Oltmann and E. B. Pretorius</i> .....	535

## REFRACTORIES

The Thermomechanical Behavior and Economy of Lightweight, Insulative Dry-Vibratable for the Tank Lining of Iron and Steel Ladles by <i>B. Porter, J. Liu and P. Satre</i> .....	551
Improved Ladle Refractory Performance at Georgetown Steel by Means of an Automated Magnesite Veneer Application by <i>M. D. Fox and S. Giordanengo</i> .....	561
Analysis of EAF Refractory Maintenance Using Electronic Data Collection by <i>J. W. Stendera and M. D. Fox</i> .....	571
Developments in the Refractory Technology of Electric Arc Furnaces in the Last Decade by <i>H. Jansen and H. G. Daldrup</i> .....	577

## SPECIAL ARCS III

Not All RHF's Are Created Equal: A Rotary Hearth Furnace Primer by <i>J. M. McClelland</i> .....	595
Steel Mill Waste (EAF Dust) Processing on a Rotary Hearth Furnace to Recover Valuable Iron Units and Zinc Oxide by <i>V. R. Daiga, D. A. Horne and J. A. Thornton</i> .....	601
FASTMET®: Proven Process for Steel Mill Waste Recovery by <i>J. M. McClelland</i> .....	613
Ladle Residue Dumping Air Emission Control at QIT-Fer et Titane, Tracy, Quebec, Canada by <i>L. Palazzo, D. Wilson, T. Cesta, M. Campanelli and J.-M. Gauthier</i> .....	629
Recycling of Zinc Bearing Residues with the PRIMUS® Process by <i>R. Heard, T. Hansmann, J.L. Roth and D. Bolten</i> .....	639

## STEELMAKING AND SOLIDIFICATION III

Advanced EAF & LF Process Optimization with Metallurgical and Thermal Models and Their Integration into Plant Information and Management Systems by <i>M. Pillwax</i> .....	659
Analysis of Thermo-mechanical Behavior in Billet Casting by <i>J. K. Park, C. Li, B. G. Thomas and I. V. Samarasekera</i> .....	669
Use of DRI and HBI for Nitrogen Control of Steel Products by <i>S. A. Hornby Anderson, D. Trotter, D. Varcoe and R. Reeves</i> .....	687

## MAINTENANCE II

Implementation of Pyrejet™ Technology in Electric Arc Furnaces at Siderrugica Barra Mansa by V. Shifrin, A. Popenov, M. Grant, O. Delabroy, G. C. de Moraes and W. do Amaral Filho .....	705
Maintaining and Increasing Electro-Magnetic Stirring Unit Service Life and Performance via the Water System by C. D. Slackford .....	715
Remanufacturing VBT™ Vacuum Interrupter Modules by C. C. Wristen .....	723

## PROCESS TECHNOLOGY FORUM III

Crystallization of Continuous Casting Mold Fluxes by E. Divry, Y. Vermeulen, E. Paransky and M. Rigaud .....	735
Dynamic Flow Behavior in the Tundish: Optimization of Grade Transitions by D. Xu, J. P. Rogler, L. J. Heaslip, J. D. Dorricott and R. Foss .....	745
Interfacial Phenomena During Interactions of Metal and Carbon-Bearing Refractories — Wettability and Carbon Transfer by L. Zhao, V. Sahajwalla, J. Spink and J. Matthews .....	755

## SLAGS II

The Fundamentals of Using Custom-Designed Slags to Remove Impurities from Liquid Steel by E. Wei, Y. D. Yang, I. D. Sommerville and A. McLean .....	767
Development of Degasser Slag Conditioning Practices at United States Steel Corp. Gary Works by G. A. Meszaros, S. R. Story, G. E. Goldsmith and C. T. Simison .....	779
The Characterization of Oxygen in Metal/Slag Reactions by M. A. Rhamdhani and G. A. Brooks .....	787
Ladle Slag Practice — Bridging the Gap Between Theory and Practical Steelmaking Concerns by F. Kemeny and J. A. T. Jones .....	797
Alloys, Metals and Slag Solidification Process Alternatives and Applications by D. Norval .....	807
Inferential Model of Desulfurization for Ladle Metallurgy by S. Subagyo, G. A. Brooks, S. Waterfall and S. Sun .....	819

## SPECIALTY STEELS

Making Round Bars with Flat Dies Using Six Sigma Techniques for the Battle of the Bulge by <i>T. J. Matthews</i> .....	831
Ladle to Tundish Transfer Improvements at J&L Specialty Steel by <i>V. F. Chevrier, D. Zacharias, J. Luic and C. Frauenholz</i> .....	843
Influence of Melt Chemistry on Stainless Steel Powders by <i>C. Schade</i> .....	855
A Model Description of the Vacuum Oxygen Decarburization Process for Stainless Steel Production by <i>B. Korousic, J. Triplat and A. Rozman</i> .....	871

## STEELMAKING AND SOLIDIFICATION IV

Influence of AIS Chemistry on EAF Steelmaking Economics by <i>S. A. Hornby Anderson, G. E. Metius and N. Kobayashi</i> .....	885
Use of Circal™ HBI in EAF Steelmaking by <i>D. A. Lockmeyer</i> .....	905
An Improved Method of Applying Chemical Energy into the EAF by <i>V. Shver, M. Cohn and M. Coburn</i> .....	917
Melt Shop Process Information System at SMI – Texas by <i>D. Patterson, C. Pullin and D. Reinhart</i> .....	927
Is Pig Iron Vital to Electric Furnace Users? by <i>C. M. Moore and J. Aylen</i> .....	939
Using Oxygen to Make Reducing Gas in the MIDREX® Direct Reduction Process by <i>R. M. Klawonn and R. Kakaley</i> .....	951
