### Conference Information

**Author Index** ..... 1037

### THE AIME KEYNOTE and the J. KEITH BRIMACOMBE MEMORIAL LECTURE

#### **The Minimill Story**

J. Stubbles ..... 3

### COKE PRODUCING/IRON PRODUCING Coke Quality and Raw Materials

#### **Mineral Phase Transformations of Metallurgical Cokes and Their Implications**

S. Gupta, V. Sahajwalla and M. Dubikova ..... 19

#### **Enhancement of Blast Furnace Reaction Efficiency Through the Use of Highly Reactive Coke**

S. Nomura, S. Matsuzaki, M. Naito, H. Ayukawa, S. Koizumi, Y. Ogata, T. Nakayama, T. Abe,  
H. Kitaguchi and T. Tahara ..... 31

#### **Correlation Between Pellet Reduction and Some Blast Furnace Operation Parameters**

U. Leimalm, L. Sundqvist-Ökvist, A. Brannmark, and B. Bjorkman ..... 39

#### **Behavior of DRI and HBI in the Upper Blast Furnace Shaft: Evolution of the Morphological Structure of Iron**

P. Kaushik and R.J. Fruehan ..... 51

### COKE PRODUCING Cokemaking Operations

#### **Improvement of Coke Oven Process for Increased Productivity**

J.-K. Park ..... 63

#### **Dofasco's No. 1 Byproducts Sulfur Filtration Improvements**

Z. Taravski, P.A. Roppel and J.D. Nicholls ..... 65

#### **Reduction of Emissions During Coking Application of PROven<sup>®</sup> for Conventional Coking — An Alternative to Heat Recovery Coking?**

M. Reinke and R. Worberg ..... 73

## Coke Battery Repairs and Rebuilds

<b>Improvement of the COG Pipeline Life Expectancy</b> C.M. Machado, L.B. Mello, P. Silvaes, P.S. Grilli and J. J. Lobato .....	81
<b>Module Cast Block — The Future of Coke Oven Repairs</b> R. Bloom and P.A. Saffrin .....	89
<b>New Coal Charging Car Installation at Dofasco’s No. 3 Coke Plant</b> M.P. Fonovic, M.C. Truckel and R.D. Chaykowski .....	95

## IRON PRODUCING Blast Furnace Refractory Applications

<b>The Introduction and Implementation of Ceramite into Republic Engineered Prodcuts – Lorain, Ohio Blast Furnace Over the Last Two Years</b> J.E. Chambers .....	105
--	-----

### Blast Furnace Hearths

<b>Mathematical Modeling of the Deadman/Hearth Region by Heat and Mass Balances — Field Application BF No. 2 – Siderar S.A.</b> F. De Vincenti and W-K. Lu .....	113
<b>Physical Modeling of Three-dimensional Flow in the Blast Furnace Hearth</b> A. Chen, E. Elsaadawy and W-K. Lu .....	123
<b>On the Causes of Hearth Problems</b> W.-K. Lu .....	133
<b>Fluid Flow and Heat Transfer Analysis in a Cooling Stave of Blast Furnace Hearth</b> K. Liu .....	147
<b>Analysis of Liquid Level and Profile Inside the Hearth of a Blast Furnace</b> D. Huang, P. Milovac, Z. Chen, Y. Zhou, P. Chaubal and C.Q. Zhou .....	157
<b>Three-dimensional CFD Analysis for Blast Furnace Hearth Wear</b> D. Roldan, Y. Zhang, R. Deshpande, D. Huang, P. Chaubal and C.Q. Zhou .....	167

### Sinter

<b>The Utilization of Iron-bearing Sludges in the Iron Ore Sintering Process</b> P. Francik and J. Mróz .....	179
<b>Emissions Control Evolution at CST’s Sintering Machine Stack</b> A.M. Ferreira, H.L. de Oliveira, M.W. Andrade, M.A. Medeiros, E.L. Harano, G. Abreu, I. Soella and E. Neto .....	187
<b>General Review of the Operation Technique for the Past Decade in Sinter Plant at China Steel</b> G-C. Lee .....	197
<b>Process Improvement in Sintering by Bed Humidification</b> S.S. Datta, B.K. Das, S.A. Balaji and A. Das .....	207

<b>Design, Development and Installation of a System for Addition of (-)10mm Lime Fines to Improve Productivity at Sinter Plant-II, Durgapur Steel Plant, India</b>	
S. T. Selvam, M.T. Raju, S.A. Balaji, A. C. Nigam, S. Chaudhuri and A.K.P. Singh .....	215

### **Blast Furnace Process and Improvement**

<b>Blast Furnace Optimization — The Next Generation</b>	
K. Stohl .....	225

<b>Technical and Operational Auditing of Blast Furnace Ironmaking Units</b>	
J. Alexander and E. van Stein Callenfels .....	235

<b>Progress in the Past Ten Years and Looking Forward to the Future for Baosteel Branch Ironmaking Technology</b>	
W. Xu, R. Lu and R. Zhu .....	247

<b>Blast Furnace Performance and Tuyere Practice at Stelco Hamilton No. 5 Blast Furnace</b>	
J. D’Alessio, W-K Lu, Z. Wu and F. Kielbowich .....	257

<b>Mathematical Modeling of Burden Distribution in the Bell-less Top Blast Furnace</b>	
T.S.P. Kumar, and K.M. Ram .....	273

### **Alternative Ironmaking I**

<b>Tecnored Ironmaking Process — The Present and the Future</b>	
J.H. Noldin Jr., M. Contrucci, I.J. Cox and K. Meijer.....	287

<b>Reduction of Iron Ores with CO-rich and H<sub>2</sub>-rich Gases: A Detailed Evaluation for Industrial Fluidized Bed Processes</b>	
S. Schuster, C. Pawlik, F. Winter, H. Mali, H. Fischer and J.L. Schenk.....	297

<b>Digital Microscopy Applied to Metallic Iron Quantification in Self-reducing Briquettes</b>	
J.H. Noldin Jr., S. Paciornik, J.C. D’Abreu, M.H. Maurício, L. Paco and J.I.C. Vera.....	309

<b>Mixed Burden Softening and Melting Phenomena in Blast Furnace Operation</b>	
P. Kaushik and R.J. Fruehan .....	319

### **Coal Injection**

<b>Control Blast Furnace Pulverized Coal Injection to Increase PCI Rates</b>	
R. Weiser, I. Braune and P. Matthes .....	335

<b>Heat Transfer, Devolatilization and Combustion of Injected Coal Before Entering Raceways</b>	
M. Gu, Z. Chen, D. Huang, P. Chaubal and C. Zhou.....	345

### **Alternative Ironmaking II**

<b>The Reduction of Iron Oxides by Volatiles in an RHF Process</b>	
I. Sohn and R.J. Fruehan .....	359

<b>Operating and Environmental Benefits from the Production of Hot Briquetted Iron</b>	
J. Stubbles .....	369

<b>Blast Furnace Efficiency Gains and Medium BTU Gas Production Using FASTOX Technology</b> M.J. Corbett, B.M. Finkelor, J. Jasbinsek and C. Kasten.....	381
---	-----

### **Blast Furnace Design and New Technology**

<b>The Evolution of Modern Blast Furnace Plant and Equipment and the Introduction of Knowledge Engineering</b> I. Carmichael, C. Thirion and R. Goffin.....	391
--	-----

<b>The Experience of Operating a Rotary Charging Unit (RCU) at the Bhilai Steel Plant</b> B.M. Boranbaev, B.L. Zhurakovskiy, V.N. Vakulin, Y.M. Glazer and S. Ahmed.....	407
---	-----

<b>Steel Mill Flooring — An Eight-year Case Study at Mittal’s IH7 Blast Furnace</b> D. Quilter and T. Kazmierczak .....	417
--	-----

<b>Blast Furnace Bosh Design and Repairs</b> R.J. van Laar, A. Meijers and F.T. Niemeijer .....	423
--	-----

<b>Developments in Blast Furnace Structural Design</b> N. Gill, C. Sanders and M. Eden.....	435
--	-----

### **ELECTRIC STEELMAKING EAF Equipment**

<b>Recent Arc Furnace Revamps for Improved Performance</b> J.K. Cotchen and E. Mueller .....	445
---	-----

<b>Ultra High Chemical Power EAF</b> R. Gottardi, S. Miani, A. Partyka, and H. Novak.....	453
--	-----

<b>Yield and Productivity Savings Using Goodfellow EFSOP™ at Macsteel Arkansas</b> J. Kelleher and M. Khan.....	463
--	-----

### **Electric Steelmaking I**

<b>Smart-Gas — A New Approach to Optimizing EAF Operations</b> J.A.T. Jones, S. Matson and P. Safe.....	473
--	-----

<b>Industrial Application of Supersonic Lance: The KT System — Numeric Simulation, Operating Practice, Results and Perspectives</b> C. Harris, G. Holmes, M. B. Ferri, F. Memoli and E. Malfa.....	483
---	-----

<b>Fundamental Understanding of Carbonaceous Materials' Influence on Slag Foaming Behavior During EAF Steelmaking</b> M. Rahman, V. Sahajwalla, R. Khanna, N. Saha-Chaudhury, D. Knights and P. O'Kane.....	491
--	-----

<b>VAI Fuchs Refining Combined Burners — An Innovative Oxygen Injection Technology</b> M. Abel and M. Hein .....	499
---	-----

<b>EAF Performance Improvement at Nucor Steel Auburn Using Goodfellow EFSOP™</b> D. Vensel and M. Khan.....	509
--	-----

<b>Best Practice — Are Minimills Comparable?</b> M. Fleischer, J. Greinacher, M. Hamy and R. Ridder .....	519
--	-----

## Electric Steelmaking II

<b>Energy Consumption in the EAF with 100 Percent DRI</b> A.N. Conejo and J.G.G. Cardenas .....	529
--	-----

<b>The Use of Hot Metal in the Consteel® EAF at Wheeling-Pittsburgh Steel</b> C. Gross, T. Brown and A. Zalner .....	537
---	-----

<b>Recycling of Waste Plastics for Slag Foaming in EAF Steelmaking</b> V. Sahajwalla, R. Khanna, M. Rahman, N. Saha-Chaudhury, D. Knights and P. O’Kane .....	547
--	-----

<b>Calcium Carbide Used as a Deoxidant during the EAF Tapping at Mittal Steel-Lazaro Cardenas to Improve the Aluminum Yield</b> R. Lule, F. Lopez A.D. Hernandez and R.D. Morales .....	555
--	-----

## SPECIALTY STEELMAKING Specialty Steelmaking

<b>The Metallurgical Study on the ESR Process for Homogeneous 10 Percent Cr-Nb-W Steel Ingots</b> D-S. Kim, S-K. Jo, K-R. Lee, S-T. Kang and J-T. Kim .....	561
--	-----

<b>Treatments of AOD Slag to Produce Aggregates for Road Construction</b> Q. Yang, L. Nedar, F. Engstrom and M. He.....	573
--	-----

## OXYGEN STEELMAKING Tapping and Carryover Control

<b>Improvements in the BOF Process at Algoma Steel Inc.</b> S. Hilderley, L. Greco, E. Wong, K. Ugahadpaga and J.O.P. Exiros .....	587
---	-----

<b>Lower Costs by Optimum EAF Tapping</b> F.L. Kemeny, D.I. Walker and J.A.T. Jones .....	593
--	-----

<b>Optimizing BOF Slag Control through the Application of Refractory Darts</b> W.S. Howanski, T. Kalep and T. Swift .....	601
--	-----

## Vessel Inputs

<b>Utilization of High Phosphorous Hot Metal in BOF Steelmaking</b> B.O. Chukwulebe .....	613
--	-----

<b>Semi-metal Production in an EAF to Supplement Hot Metal Supply to BOFs</b> N.P. Prabhu and M. Alavanja.....	623
---	-----

<b>Simulation of BOF Barrel Shell Growth</b> E-S. Chen, and J.B. Boyce .....	633
---	-----

<b>Improved Design of Bricks for Intermittent BOF Operations</b> R. Mishra, S. Mukopadhyay, Y.K. Tripathi .....	643
--	-----

### **Charge Management**

<b>Hot Metal Process Improvement at Mittal Steel, Sparrows Point via Technology Implementation Including a Sensor-based Sulfur Sampling System</b> R. Fash, W. Howanski, D. Neith, D. Patterson, R.P. Stone and M. Borsody .....	651
---	-----

<b>Kinetics of Resulfurization in the Magnesium Desulfurization Process of Molten Iron</b> J. Yang, M. Kuwabara, K. Okumura, Z. Liu and M. Sano .....	663
--	-----

<b>Mn Control at KOBM Steelmaking</b> D. Liao, S. Sun and N. Pyke .....	675
--	-----

### **Vessel Practices**

<b>Implementation of the Bath Agitation Process on BOS Veseels</b> B. Freeley, J. Madill and M. Evans .....	685
--	-----

<b>Research and Development of BRP Technology at Baosteel</b> Z.X. Lu and X.K. Jiang .....	697
---	-----

<b>The Results of Four Years of Commercial Operations for Praxair's BOF CoJet® Gas Injection System</b> C.J. Messina, J. Kelly and M.F. Riley .....	703
--	-----

<b>Cold Shroud Oxygen Blowing for Improvement in Converter Productivity</b> J. Batham, T. Balkos, A. Richardson, B. Howanski and R. Fash .....	711
---	-----

## **LADLE AND SECONDARY REFINING**

### **Refining and Stirring**

<b>CFD Study on Slag-Steel Interaction in an Argon Bottom-stirred Ladle</b> P. Ridenour, H. Yin, C. Tetrault, S.R. Balajee and P. Chaubal .....	721
--	-----

<b>Mathematical Simulation on the Refining Process of 300-tons LF Stirred by Argon at Baosteel</b> J. Fan, S. Ren, Z. Huang, Y. Cheng and Y. He .....	731
--	-----

<b>Alloy Dissolution in Argon Stirred Steel</b> D.S. Webber, K.D. Peaslee and V.L. Richards .....	741
--	-----

<b>In-situ Observation and Thermodynamics of the Chemical Reaction Between AlN Particles and Molten Slag</b> H. Yin and G. Skoczylas .....	753
---	-----

<b>Physical Modeling of Vacuum Decarburization in an RH Degasser</b> A.T.P. Almeida, J.A. Alvarenga, T.J.P. Belarmino, A.C. Filho, A.A. Nascimento and R. Tavares .....	761
--	-----

<b>The Development of a New Approach to Deoxidation at Nucor Steel - Hickman</b> T.W. Junker and R.R. Rote and P.K. Ghosh .....	771
--	-----

### **Ladle Refractory**

<b>Heat Transfer Analysis of Molten Steel in a Ladle</b> Q. Liu, K. Wu, G. Yu, C. Han and K. Cai.....	785
<b>Energy Savings at V&amp;M Star with Microporous Insulation</b> S. Elliott, M. Blaner, B. Kepko and J.R. Doty .....	795
<b>Introduction of Alumina Magnesia (AM) Spinel-forming High Alumina Castable in a VAD Ladle</b> S. Sarkar, P. Nandi, D. Halder, P.K.R. Chowdhuri, S.S. Datta, K. Banerjee and H. Mukherjee .....	803
<b>Spinel Bonded MgO-C Refractories for Steel Ladle Applications</b> R. Mishra, S. Mukopadhyay and S. Chatterjee .....	809
<b>Performance-proven Insulation of a 60-ton Steel Ladle with Skamol VIP-12 HS</b> L.F. Juhl, M. Feldstedt, M. Pedersen, Y.-S. Cho and D. Bae.....	815

### **CONTINUOUS CASTING AND PROCESS AND PRODUCT METALLURGY Metallurgy Mold**

<b>Micromechanical Evaluation of Intergranular Crack Growth Under Continuous Casting Conditions</b> C. Chimani, G.X. Shan, K. Mörwald, O. Kolednik, H.J. Böhm, D. Duschlbauer and T. Drabek.....	825
<b>Strand Surface Cracks — The Role of Abnormally Large Prior Austenite Grains</b> R.J. Dippenaar, S.-C. Moon, and E.S. Szekeres.....	833
<b>Continuous Casting Experience with W-bearing Steel for High Temperature Service</b> J.C. Gonzalez, G. Cumino, S. Caminada and M.R. Ridolfi .....	845
<b>Application of Specialty Mold Coatings for Conventional, Medium and Thin Slab Casting</b> C.B. Donovan, W.H. Emling and M.R. Badger and J.B. Sears.....	851
<b>Pushing the Boundaries of Mold Plate Coatings</b> B. Stalker, K. Goode, D. Preshaw, M. Pitchford, H.P. Hengeveld, B. Allcock and C.M. Kay.....	861
<b>Influence of Sulfur Content and Molten Steel Flow on Entrapment of Bubbles to Solid/Liquid Interface</b> T. Miyake, M. Morishita and M. Kokita .....	869

### **CONTINUOUS CASTING Inclusions Metallurgy**

<b>A Study of Casting Issues Using Rapid Inclusion Identification and Analysis</b> S.R. Story, R.J. Fruehan, G.S. Casuccio, M.S. Potter and D.M. Williams.....	879
<b>Morphology and Precipitation Mechanism of Copper Sulfide in Strip Casting of Low Carbon Steels</b> Z. Liu, Y. Kobayashi, J. Yang, K. Nagai and M. Kuwabara .....	891

**Mechanism of Hook Formation in Ultra-low Carbon Steel Based on Microscopy Analysis and Thermal Stress Modeling**  
J. Sengupta, B.G. Thomas, H.-J. Shin and S.-H. Kim ..... 903

**Unsteady State and Inclusion Control During the Steel Continuous Casting**  
S. Liu, M. Liang, S. Niu, C. Li, L. Zhang and X. Wang ..... 915

### **Enhanced Production**

**Cast Floor Robotics — Concept and Testing**  
A. Jungbauer, J. Penn, J. Lanschützer and H. Ebner ..... 931

**Achieving Enhanced Caster Performance by Utilizing Accurate and Reliable Continuous Temperature Measurement**  
R. Gass, R. Kosty and M. Kendall ..... 939

**Mixed Grade Model Development and Implementation at Dofasco**  
S.D. Chung, K. Delaurier, B. MacCuish and B. Cuthbertson ..... 947

**The Latest Continuous Casting Design for Increased Production, Extended Product Mix and Optimum Quality**  
C. Geerkens, J. Kempken, J. Dzierzawski, M. Becker and U. Kerp ..... 957

**Improvements at Mittal Steel Sparrows Point Tundish Draining through Direct Bath Height Measurement**  
R.E. Fash, G. Moulden and K.J. Bertermann ..... 967

### **Tundish Production**

**Water Modeling of Fluid Flow Dynamics of Vortex Formation in a Tundish during Steady and Unsteady State Operations**  
G.S. Diaz, A.R. Banderas, J.J. Bareto and R.D. Morales ..... 977

**The Effect of Low Thermal Expansion Raw Material on Microstructure and Spalling Resistance of the Slide Gate Plate**  
T. Suruga, Y. Yamamoto, T. Inoue, J. Yoshitomi, and K. Asano ..... 985

### **Mold Operations**

**Innovative Control Methods to Overcome Periodic Disturbances on Continuous Caster Mold Level**  
M. Dussud, F. Montégu, G. Kim, S. Lee, J. Lottin and E. Fortaleza ..... 995

**Developments on Fluid Flow and Heat Flow Theories in the Continuous Casting Mold**  
R.D. Morales and P. Ramírez-López ..... 1005

**Mathematical Modeling of Thermal-fluid Flow in the Meniscus Region During an Oscillation Cycle**  
C. Ojeda, J. Sengupta, B.G. Thomas, J. Barco, and J.L. Arana ..... 1017

**New Sensor Improves Productivity and Quality**  
P. Muller and I. Schubert ..... 1029
