

FORWARD

Covering 168 steel producers, re-rollers, coaters, and tube makers, this India Atlas presents a clear overview of one of the world's fastest growing steel communities. Also included are capacity figures for 117 companies, details of India's major steel service centres, and the country's known iron ore reserves. A comprehensive index lists mills by name, location and product for quick and convenient reference.

Indian steel industry research is also available on request; please contact:
